DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 4, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by Hirt.

With respect to claim 1, Hirt discloses a wheel for motor vehicles comprising a wheel hub a, a rim a1, and spokes a4 by which the wheel hub a and the rim a1 are connected ^{to} ~~with~~ one another, wherein, in first areas near reference character "a" in Figure 3 connected with the wheel hub a, the spokes a4 have solid cross-sections and, in second areas connected with the rim a1, the spokes have V-shaped cross-sections as shown in Figures 3 and 4. Because the spokes a4 is a solid and not hollow spokes, the first areas where the spokes are connected to the hub have solid cross-sections.

With respect to claim 4, Hirt discloses a wheel for motor vehicles wherein in the second areas with the V-shaped cross-sections, the spokes have thickenings 12, 13 on respective free front surfaces of legs thereof as shown in Figure 4.

With respect to claim 15, Hirt discloses a wheel for motor vehicles wherein transitions from the first areas to the second areas take place in a progressive transition.

Allowable Subject Matter

3. Claims 2-3, 5-14, and 16-17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

4. Applicant's arguments filed on February 13, 2003 with respect to claims 1 and 15 have been considered but they are found to be non-persuasive. Applicant argues that the Hirt reference fails to disclose a wheel including spokes having solid cross-sections in the first areas connected with a wheel hub and V-shaped cross-sections in second areas connected with a rim as claim 1 defines. However, applicant has failed to claim where the first areas and the second areas are. As best interpreted from the claim, the first area of Hirt is near "a" in Figure 3 where the spokes have solid cross-sections and the second areas at section "4 - - 4" have V-shaped cross-sections in Figure 3.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 3617

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
